Despite the overly-simple point-and-click gameplay, I'm surprised at how nice this actually is with its also simple plot and mechanics.. If ur buyin it because of Valentino Rossi do it...

but keep in mind that the GPbikes part of the game is terrible against motogp13-14-15

multiplayer errors...connection to the host has been lost.... blablabla

Buy it if u want to play single player only!Playin online is nearly impossible.... There are even more trolling asshats than in normal matchmaking bloody♥♥♥♥♥. Game doesn't even work on recent versions of OS X. I wish I could have played and reviewed the game. However I can't, and DotEmu didn't answer my support request email. Further, since I purchased this over 14 days ago, valve is refusing to refund.

Don't buy. It will be a waste of money.. Dated as ♥♥♥♥♥ part 2 Electric Buguloo. What a piece of Junk!!!! Before I could even begin to play the game, it kept changing the resolution of my screen so half the controls and a third of any map displayed was off the screen. Then the bombshell, it failed time and time again to install updates and then five minutes of waiting for it to install files before you can begin. Feeling miffed, we were when we then found theres no tutorial mode even if we could play with a fair proportion of the map, controls and messages missing!!!!!!

This thing would cost too much if it was free!. I NOT CAN PLAY. I wish the music from the beach was playing in the background constantly but quieter. Anyway, really nice, relaxing game.. Pretty much everything I would expect from a game of this kind. Sure, there are some inherent issues regarding the state of the game, but on the other hand many aspects have been addressed since the release, via daily patches. The game has great potential, while the dev is more than open to all suggestions that could make Age of Gladiators II: Rome a better game.

The mechanics of this game revolve around statistics and menus, and fixing things in those departments shouldn't be that big of a deal.

Runs well, plays well but there's no challenge as of september 2018. Props to the one dev for making this game and I hope he continues to make it worthwhile but unfortunately there are more challenging games elsewhere: Free to play shooters, multiplayer shooters that have more advanced A.I. for solo gamers, brutal single player shooters like EASY RED which is only \$4. The gameplay mechanics are tight though so I hope the dev does something great with it. This game is frustrating. It keeps locking up in the middle of playing. I will be an hour into the mission and it will randomly freeze and I will lose my progress.. Good stuff in this pack but it should've been a free update rather than paid DLC.. good game wish it wasn't so laggy
. this game is the reason Day-Z will never leave Alpha. 2 spooky 4 me
-Dean Hall. One of the best games I've ever played in my entire life.

The campaign is more entertaining than a blockbuster movie.

The gameplay is dynamic and fun as hell.. This game is honestly the best game I've ever played, people saying it's dead make it dead. You gotta have an upbeat and positive attitude and those saying this is dead are only contributing hate and not love. I only got it for a dollar but I would of gladly paid the full 5. I always say a game must be worth an hour of fun per dollar, but this is at least 5 dollars worth of fun. The amount of work and excellency required to make this product puts triple AAA developers to shame. I'll see you on the battlefield, plastics.. Primary school in a nut shell
