The image shows the JUNO-D2 EDITOR software interface. At the top, there are buttons for "READ", "SYNC", "WRITE", and "KEYBOARD". The main title "JUNO-D2 EDITOR" is on the right. The interface is divided into several sections: "MODE" (PERFORM, PATCH), "SYSTEM" (COMMON, PERFORM EFFECTS, PERFORM, PERFORM PATCH), and "ALL PARAMS". The "ALL PARAMS" section is the largest and contains six rows, each representing a different part of the synthesizer. Each row has a "MUTE SOLO" button, a "GROUP" dropdown (PRST), a "CATEGORY" dropdown (PLS, BTS, PNO), and a "NUMBER" field. Below these are various parameter controls: LEVEL, PAN, VEL SENS, OCT SHIFT, TUNE COARSE FINE, PB RANGE, MONO/POLY, LEGATO, PORTAMENTO, VIBRATO, VOICE RESERVE, and OFFSET. The "MIDI MESSAGE" field at the top right shows "FO 41 10 00 00 3A 12 10 00 04 00 02 6A F7".

Also I thought I'd mention (since this isn't obvious and there is no documentation for the editor yet) that the editor allows you to send a MIDI Note-on command (with fixed 127 velocity) when clicking on any of the 38 tabs in the drum editor window with the right mouse button.. One thing you might have noticed is that a JD-Xi drum kit actually contains 38 parts, not just 26 as mentioned in the Roland manual, that's why the editor window has 38 drum part tabs.
